PLEASE READ THE INSTRUCTIONS CAREFULLY <u>BEFORE</u> FITTING THIS KIT. If you have a problem, however small, call our Technical Department.

Tel:- 01925 636950. Fax:- 01925 243111. Monday to Thursday 8.30am - 5pm.

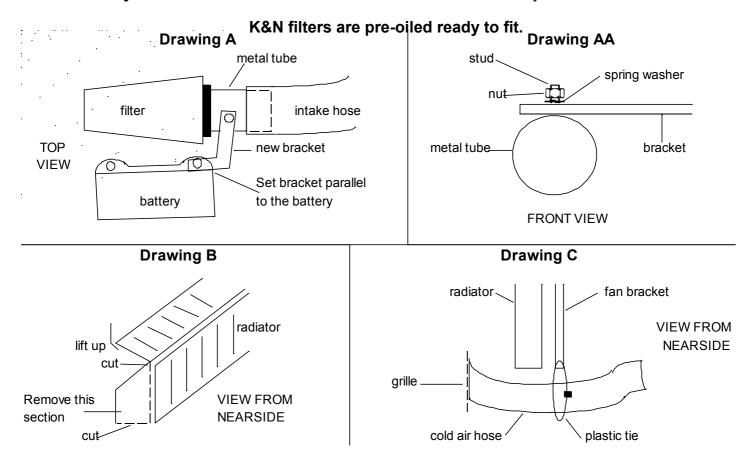

- 1 Remove the two screws attached to the battery carrier and lift out the complete air filter assembly.
- **2** Leave in place the intake hose attached to the throttle body.
- **Drawing AA.** Fit the bracket to the top of the metal tube using the stud, nut and spring washer. Fit the **long end** of the tube into the intake hose.
- 4 Fit the bracket to the rear hole in the battery carrier, using the M8 hex screw and washer.
- Fit the filter to the tube with the intake at the bottom. Check all round for clearance and adjust until the K&N logo is straight before tightening in place. Tighten the clip until the filter <u>just rotates</u>, then give one full turn (360 degrees) <u>No more</u> <u>Don't overtighten the clips</u>.
- **6 Drawing B.** Release plastic flap and lift up, cut away section of plastic as shown.
- 7 Using a plastic tie attach the rubber cold air hose to the fan bracket. **Drawing C.**
- 8 Tuning.

CAT Cars. No adjustments are required.

An increase in fuel may be required, if further engine modifications are to be carried out

9 Filter Maintenance.

Under normal conditions clean and reoil the filter at approximately 40,000 miles 65,000 km. **Use only K&N cleaner and oil** and follow the instructions carefully.

This Kit Should Contain :-

- 1 x Air filter.
- 1 x Hose clip size 44.
- 1 x Metal Tube.
- 1 x Rubber cold air hose.
- 1 x Instruction sheet.
- 1 x Instruction pack
 - 1 x Filter maintenance sheet
 - 1 x K&N window sticker.
 - 1 x Million mile warranty card
 - 1 x Leaflet
 - 1 x Leaflet.
- 1 x Fixing kit containing :-
 - 1 x Bracket
 - 1 x Plastic cable tie (14" long)
 - 1 x M8 x 16 hex screw
 - 1 x 5 / $_{16}$ spring washer
 - 1 x M₆ nut
 - 1 x 6mm spring washer

FITTING YOUR OWN 57i KIT

If not, it is essential that the person fitting the kit (e.g. mechanic) carefully follows these particular instructions even if he has fitted K&N kits before. This will save you both time and money. Kits incorrectly fitted may show a loss in performance e.g. the positioning of the essential cold air hose, (flexi expandable and rubber hoses are used).

A final check under the bonnet, by yourself, with the instructions, would seem sensible.

The advantage's of K&N's cold air intake system

Cooler air being denser will show positive improvements over systems that draw hot air from the engine bay.
